Description of the Work:

The drawings itemized above are to replace drawings of the same number from the IFC drawing set issued April 27th, 2017. These revised drawings affect work throughout the project and must be reviewed in their entirety by all trades and suppliers to ensure compliance.

Reason:

Architectural Construction Issue Drawings have been updated as per the above referenced pages. The majority of changes relate to revised tile specifications and layout, cafeteria juice bar redesign, revised washroom partitions, and finalized test facility layout. Note that this is not a comprehensive list of all changes that have been made and it is the responsibility of all trades and suppliers to read and follow the current set of drawings and specifications at all times.
