

SUBMITTAL / SHOP DRAWING REVIEW

This submittal/shop drawing review is for general conformance with drawings and specifications only.

Contractor is completely responsible for all dimensions, details, quantities, supply, installation and construction.

This review does not in any way relieve the Contractor of responsibility for compliance with the Contract Documents.

Client:	Catholic District School Board of Eastern Ontario
Project:	St. Mary Catholic School Carleton Place, Ontario
Submittal:	Electrical
Notes:	<p><i>- Light Fixtures - No comment</i></p> <p><i>- Alternate Wall Switch – No comment</i></p> <p><i>- Electrical panel – shall be 100A, 120/208V, 1PH, as discussed on site</i></p>

MORRIS ENGINEERING LTD.

68 William Street, Suite 200, Brockville, Ontario

Project:	ST MARY'S CATHOLIC SCHOOL
Type:	F1
Date:	JULY 11 2019
Product Code:	
Approval:	

Performance and style with LED technology.

BLR - SPECIFICATIONS MAY CHANGE WITHOUT NOTICE

Superior-grade, recessed low profile lay-in T-Bar luminaire. Its ideal for indoor use where aesthetics, energy-efficiency and T-Bar mounting is essential. Its low-profile body is ideally suited for shallow, or obstructed plenum installations.

FEATURES

- Available in 1x4, 2x4 and 2x2 dimensions
- 3000K, 3500K, 4000K and 5000K light colours available
- Diffuser provides a uniform lighting surface
- L70 of 120,000 hours
- Type IC

OPTIONS

- Various sizes available: 1x4, 2x4 and 2x2

APPLICATIONS

- Hospitals
- Offices
- Schools

OPTICS

Pre-painted body in high-reflectance white. Frosted flat lens provides even light distribution.

ELECTRICAL

All components have met all regulatory approvals. Fixture is available in 120 - 277VAC and 347V options.

MOUNTING

Holes provided for chain or hanger wire mounting support for T-Bar ceilings.

CONSTRUCTION

Pre-painted, high reflectance white body is precision bent for added strength and rigidity. 0.030" nominal thick steel. Hinged door frame with frosted flat acrylic lens for even light distribution. Shallow fixture design provides a clean appearance for many environments.

Selectable operation, walk-through, test
and presentation modes for increased
energy savings and convenience

Defaults to Manual-ON operation for
maximum energy savings

Part of a comprehensive line of PIR,
Ultrasonic and Dual Technology wall
switch sensors

Description

The DW-100 dual technology wall switch sensor combines the benefits of passive infrared (PIR) and ultrasonic technologies, and can turn lights OFF and ON based on occupancy. It is characterized by high sensitivity to small and large movements, appealing aesthetics, and a variety of features.

Operation

The DW-100 fits in a single gang junction box. Once the lights are ON, detection by either technology holds lights ON until occupancy is no longer detected and the time delay elapses. DIP switch settings allow for a variety of control options including Auto-ON operation, walk-through and test mode. By default, Auto-ON turns lighting on when both PIR and ultrasonic technologies detect occupancy. Additional DIP switch settings allow the user to choose which sensing technologies turn ON and hold ON the lighting.

Features

- Complies with 2011 NEC requirements
- Detection Signature Processing eliminates false triggers and provides immunity to RFI and EMI
- Zero-crossing for long relay life
- Vandal resistant lens combines precise coverage with durability
- Choice of Manual-ON or Auto-ON operation
- Selectable walk-through mode turns lights off three minutes after the room is initially occupied if no motion is detected after the first 30 seconds
- Test mode allows quick and easy adjustments
- Selectable audible alert for impending shutoff
- In automatic mode, sensor returns automatically to Auto-ON after lights are turned off manually; ideal for presentations
- Four occupancy logic options give users the ability to customize control to meet application needs
- Optional light level sensing with simple setup
- Service mode allows sensor to operate as a service switch in the unlikely event of a failure
- Sensor coverage tested to NEMA Guide Publication WD 7-2000
- Compatible with decorator wall plates
- BAA/TAA-compliant models available

Manual-on Control

Factory default operation is for Manual-ON, so that users turn lights on only when needed. This control strategy is proven to save more energy than Auto-ON, and is required in ASHRAE 90.1-2010. If desired, the DW-100 may be reconfigured to turn lights on automatically.

Applications

Wattstopper's dual technology has the flexibility to work in a variety of applications where one technology alone may not be sufficient. Common applications include small and executive offices, small and medium conference rooms and lunch/break rooms. In addition, dual technology sensors are the perfect choice for ADA-compliant buildings due to lower mounting height requirements.

Specifications

- DW-100: 120/277 VAC; 50/60 Hz
@ 120 VAC, 0-800 W ballast or tungsten, 1/6 hp
@ 277 VAC, 0-1200 W ballast
- Time delays: 5, 15 or 30 minutes, walk-through, test-mode
- Coverage: Major motion, PIR 35' x 30', Ultrasonic 20' x 20'
Minor motion, PIR 20' x 15', Ultrasonic 15' x 15'
- Ultrasonic Frequency: 40kHz
- Sensitivity adjustment: PIR (high/low), Ultrasonic (fully variable)
- Dimensions: 2.73" x 1.76" x 1.83"
(69.3mm x 44.7mm x 46.5mm) L x W x D
- UL and cUL listed
- Five year warranty
